ASSEMBLY INSTRUCTIONS

1. Assemble the parts in the order shown in the exploded view.

2. Tighten the nuts and washers to the torque specified in the table below.

3. Check the alignment of the parts and adjust as necessary.

4. Check the operation of the assembly and make any necessary adjustments.

5. Check the clearance of the parts and make any necessary adjustments.

6. Check the fit of the parts and make any necessary adjustments.

7. Check the finish of the parts and make any necessary adjustments.

8. Check the weight of the assembly and make any necessary adjustments.

9. Check the balance of the assembly and make any necessary adjustments.

10. Check the vibration of the assembly and make any necessary adjustments.

11. Check the noise of the assembly and make any necessary adjustments.

12. Check the temperature of the assembly and make any necessary adjustments.

13. Check the pressure of the assembly and make any necessary adjustments.

14. Check the flow of the assembly and make any necessary adjustments.

15. Check the speed of the assembly and make any necessary adjustments.

16. Check the torque of the assembly and make any necessary adjustments.

17. Check the tension of the assembly and make any necessary adjustments.

18. Check the compression of the assembly and make any necessary adjustments.

19. Check the expansion of the assembly and make any necessary adjustments.

20. Check the contraction of the assembly and make any necessary adjustments.
